Personal Statement

MSc Data Analytics candidate with a BSc in Computer Science and 3 years of experienced in financial market analysis across crypto, forex, futures, options and equities/stocks. Dissertation built an XGBoost model predicting UK residential CO2 emissions at R2 is 0.96 with SHAP-based interpretability. Strong in Python, SQL, BI, Excel and Financial market analysis with real markets knowledge alongside. Seeking a Data Analyst role in UK fintech.

Education & Qualifications

UNIVERSITY OF HUDDERSFIELD, MSc DATA ANALYTICS, UK

MAY 2025 – MAY 2026

- Modules are Machine Learning, Statistical Analysis, Big Data Analysis, Predictive Modelling, Python for Data Science, Data Visualization

UNIVERSITY OF MANAGEMENT AND TECHNOLOGY, BSc COMPUTER SCIENCE, PAKISTAN

SEP 2019 – SEP 2023

- Final year project: *Bid Bazar*, a full-stack auction site, later acquired by my supervisor

Key Project

MSc DISSERTATION, PREDICTING CO2 EMISSIONS FROM UK HOUSING DATA | [GITHUB LINK](#)

- Cleaned 139,150 UK EPC residential records down to 110,031 using IQR-based outlier removal on the target.
- Engineered features from raw description fields like roof insulation depth, wall and floor type, glazing, fuel group, and construction-year midpoint.
- Benchmarked four regressors on an 80/20 split. So, XGBoost won (R2 is 0.96, MAE is 0.20), ahead of Gradient Boosting (0.95) and Random Forest (0.93). Confirmed with 5-fold CV.
- Built a parallel High/Low emitter classifier on the median split with 96.2% accuracy, F1 is 0.96.
- Applied SHAP on the tuned XGBoost to identify which features drive emissions up or down useful for retrofit prioritization.
- Delivered reproducible Jupyter notebooks with Matplotlib and Plotly visualizations alongside the written dissertation.

Employment History

WEB DEVELOPER, AKVON IT SOLUTIONS | PAKISTAN

JUL 2023 – APR 2025

- Maintained client-facing web apps in React, Laravel/PHP, MySQL and Inertia.js as part of a small dev team.
- Built a session-based auth system with role-based access for production accounts.
- Optimised the schema across 11 relational databases and rewrote slow SQL on high-traffic endpoints.
- Developed 7 REST APIs and supporting pipelines, cutting data transfer time by 30%.
- Owned database design decisions and stakeholder communication for an Australian client.

LINKS AVAILABLE ON REQUEST, SUBJECT TO COMPANY RESTRICTIONS.

FINANCIAL MARKET ANALYST

2021 – PRESENT

- Analysed financial markets independently since 2021 across crypto, forex, futures, options and equities covering both technical and fundamental sides.
- Read price action, chart patterns, volume and open interest across multiple timeframes.
- Studied multiple years of historical setups to understand how technical patterns typically work.
- Reviewed company earnings reports revenue, margins, guidance, balance sheets to build views on individual stocks.

- Tracked CPI, GDP, unemployment, central bank policy, interest rate decisions, and global news. Also, read COT reports to gauge institutional positioning.
- Produced monthly probability-weighted outlooks combining macro data, positioning, and technical setups.

Social Work

COMMUNITY VOLUNTEER, UNIVERSITY-AFFILIATED NGO | PAKISTAN

2022 – 2023

- Led food drives and Ramadan iftar distribution for underprivileged families, coordinating donations and a team of volunteers.
- Worked across donors, volunteers and families from different backgrounds and picked up strong coordination, planning and people skills.

Skills & Achievements

- **Programming:** Python, SQL, Git, GitHub.
- **Data Analysis and ML:** Pandas, NumPy, Scikit-learn, XGBoost, Random Forest, Gradient Boosting, GridSearchCV, Cross-Validation, SHAP, Feature Engineering, Time Series Analysis.
- **Visualization and BI:** Excel (Advanced), Power BI, Tableau, Matplotlib, Plotly, Interactive Dashboards, KPI Tracking and Reporting.
- **Data Management:** MySQL, PostgreSQL, Database Design (10+ tables), ETL Pipelines, Data Cleaning, IQR Outlier Removal.
- **Cloud and Data Platforms (Familiar):** Microsoft Azure, Google Big Query.
- **Statistical Methods:** Hypothesis Testing, Predictive Modelling, Regression Analysis, Root-Cause Analysis.
- **Financial Analysis:** Technical and fundamental analysis, equities earnings, macro data (CPI, GDP, rates, central bank policy), COT positioning, market microstructure, Risk Management, Position Sizing, Time Series Pattern Recognition.
- **Web Development:** HTML, CSS, JavaScript, React.js, Laravel (PHP), RESTful APIs, Inertia.js.
- **Business and Communication:** Stakeholder Management, Stakeholder Reporting, Data-Driven Documentation, Presentation of Insights, Requirements Gathering.
- **Leadership:** Project Planning, Milestone Tracking, Cross-Functional Collaboration, Agile Working.

Certifications

AI-POWERED DATA ANALYTICS, CODEWITHHARRY | ONLINE

NOV 2025 – APR 2026

- Advanced Python, SQL for analytics, advanced Excel, Git/GitHub, AI tools for analysts, probability and statistics, Power BI.
