

Hassan Ijaz | Data Analyst

United Kingdom

☎ +44 7884 527418 • ✉ oohassanijaz@gmail.com • in oohassanijaz

Profile

Data professional with a master's degree in data analytics, skilled in transforming complex datasets into actionable insights. Proficient in Python, SQL, Excel, Power BI, Tableau, machine learning, and statistical analysis to identify patterns, evaluate trends, and support data-driven decision making. Brings additional value through knowledge of financial markets, macroeconomic developments, chart analysis, and risk focused thinking. Able to deliver clear reports, dashboards, and analytical insights that help organizations make more informed strategic and financial decisions.

Education

University of Huddersfield, UK

MSc Data Analytics

2025–Present

Core modules: Machine Learning, Statistical Analysis, Data Mining, Big Data Analytics, Data Visualisation, Predictive Modelling, Research Methods, Python for Data Science

Dissertation: Predicting CO₂ Savings of Energy Efficiency in UK Housing

University of Management & Technology, Pakistan

BS Computer Science

2019–2023

Core modules: Data Structures, Algorithms, Database Systems, OOP, Web Development, Discrete Mathematics, Linear Algebra, Probability & Statistics

Final Year Project: BidBazar an online auction portal acquired by a furniture auction company

Experience

Akvon IT Solutions

Web Developer

Jul 2023–Apr 2025

- Developing and maintaining web applications
- Implemented data pipelines, and developed front-end interfaces using React, PHP/Laravel, and MySQL

Self-Learning

Financial Market Analyst

2021–Present

- Analysed crypto, forex, futures, and options markets using fundamental and technical analysis
- Developed data driven trading strategies and market insights using economic indicators

Projects

CO₂ Savings Prediction Model: Developed a machine learning pipeline to predict CO₂ savings from energy efficiency measures in UK housing using Python, Pandas, and Scikit-learn. Delivered a well documented ML pipeline with clear visualisations for stakeholder reporting.

Campvine CMS: Designed and built a custom Content Management System for Campvine (Australia) using Laravel, React, Inertia.js, and MySQL. Delivered a fast, secure CMS tailored to client needs.

Skills

Programming: Python, SQL, JavaScript, PHP, React, Laravel, MySQL, Tailwind CSS

Data & Analytics: Pandas, Scikit-learn, Power BI, Tableau, Excel, Statistical Analysis, Data Visualization, Machine Learning, Plotly, Exploratory Data Analysis (EDA)

Financial & Analytical Knowledge: Financial Market Analysis, Macroeconomic News Interpretation, Technical Chart Analysis, Market Trend Analysis, Risk Awareness, Data-Driven Decision Making

Tools: Git/GitHub

Other: Data Storytelling, Dashboard Design
